STUDENT PROFILE FORM

1. BASIC PERSONAL INFORMATION

Full Name: Adithya B K **Date of Birth:** 10/10/2004

University Reg. No: 4PS23CI003 **Gender:** MALE

Department / Branch: Computer Science & Engineering (Artificial Intelligence & Machine Learning)

Contact Number: 8971095311

Specialization: Artificial Intelligence & Machine Learning

Official Email ID: adithyaappu677@gmail.com

Year of Study: 6th Sem(3rd Year)

Current Address: Bellibettadakavalu Villege, Kasaba Hobli, Krishnarajapete Taluk, VTC: Bellibettadakaval, PO: Bandihole, Sub District: Krishnarajpet, District: Mandya, State: Karnataka, PIN Code: 571426

2. ACADEMIC DETAILS

Qualification	Institution / University	Year of Passing	Percentage / CGPA
Current Degree (UG/PG)	PES COLLEGE OF ENGINEERING, MANDYA	2027	7.73 CGPA
12th / Diploma	CHRIST THE KING PU COLLEGE, K R PETE	2022	90%
10th / SSC	SSKC ENGLISH MEDIUM HIGH SCHOOL, K R PETE	2020	81%

Current CGPA: 7.73 **Active Backlogs:** 0

3. TECHNICAL SKILLS

Programming Languages: Python, C, Java (Basic), SQL, Swift

Core Technical Skills: Machine Learning, Data Analysis, Data Visualization, Database Management Systems, Problem Solving, Web Application Development, Artificial Intelligence Fundamentals

Tools & Technologies: Power BI, MySQL, Linux, GitHub, React, TypeScript, Tailwind CSS, Firebase, Arduino, Judge0 API, LangChain.

4. PROJECTS DETAILS

Project Title:	Startup Investment Trends in India	Domain:	Data Analytics / Business Intelligence
Duration:	1 Month	Role:	Data Analyst & Dashboard Developer

Tools Used: Python, MySQL, Power BI

Description (Problem & Outcome):

Analyzed real-world Indian startup funding datasets to identify key investment trends across industries and cities. Performed data cleaning, database structuring, and visualization using Power BI dashboards. The project highlights sector-wise investments, leading startup hubs, and funding growth patterns, enabling better understanding of India's startup ecosystem.

Project Title:	MEDIREAD – AI Based Medical Report Understanding System	Domain:	Artificial Intelligence / Healthcare Technology
Duration:	Project Development	Role:	AI System Developer

Tools Used: Python, Natural Language Processing (NLP), Machine Learning Concepts

Description (Problem & Outcome):

Developed an AI-based system that simplifies complex medical reports into easy-to-understand language for patients. The system analyzes medical terminology and generates simplified explanations using Natural Language Processing techniques, helping users better understand their health reports and improving accessibility to medical information.

Link (GitHub/Demo): **MEDIREAD – AI Based Medical Report Understanding System**

Project Title:	Digital Agriculture Coordination Platform (KrishiMitra)	Domain:	AgriTech / Digital Governance
Duration:	Project Concept & System Design	Role:	System Designer

Tools Used: System Design, Database Structuring, Digital Platform Architecture

Description (Problem & Outcome):

Designed a digital coordination platform connecting Farmers, Farmer Producer Organizations (FPOs), and Gram Panchayats to streamline agricultural communication and support services. The platform includes structured crop reporting, government scheme tracking, and market information modules. Proposed a QR-based Digital Farmer ID system to enable faster farmer verification and efficient service delivery.

Link (GitHub/Demo): **Digital Agriculture Coordination Platform (KrishiMitra)**

Project Title:	THE TYPING ARENA – Real-Time Typing Competition Platform	Domain:	Web Development / Software Engineering
Duration:	Event Platform Development	Role:	Full Stack Developer

Tools Used: Lovable AI, HTML5, CSS3, JavaScript, Git, GitHub

Description (Problem & Outcome):

Designed and developed a real-time web platform to conduct multi-round typing competitions including Typing Master, Blind Typing, and Code Rush. Implemented authentication, automated scoring, and live leaderboard features to manage competitions efficiently. The platform supports simultaneous participation and ensures fair evaluation during technical events.

Link (GitHub/Demo): **THE TYPING ARENA – Real-Time Typing Competition Platform**

Project Title:	Cancer Cell Prediction using Machine Learning	Domain:	Artificial Intelligence / Healthcare
Duration:	6 Weeks	Role:	Machine Learning Developer

Tools Used: Python, Machine Learning Algorithms, Data Analysis

Description (Problem & Outcome):

Developed a machine learning-based approach to analyze healthcare data and predict cancer cell patterns. The project explored data-driven techniques for early detection and demonstrated the application of AI in medical diagnostics.

Project Title:	Basic iOS Application using Swift	Domain:	Mobile App Development
Duration:	iOS Development Program	Role:	App Developer

Tools Used: Swift, Xcode, iOS SDK

Description (Problem & Outcome):

Developed a basic iOS application as part of the iOS App Development program, implementing Swift programming concepts and building user interface components using Xcode.

5. TRAINING / PROGRAMS

Program Name: TechSaksham – Foundation Course on Industry 4.0 Technologies

Organized By: Microsoft & SAP (CSR Initiative)

Implemented By: Edunet Foundation in collaboration with AICTE

Duration: 1 Month

Key Skills Learned:
• Data Analytics Fundamentals
• Python for Data Analysis
• Database Concepts using MySQL
• Data Visualization using Power BI
• Introduction to Industry 4.0 Technologies

6. CERTIFICATIONS

- Foundation Course on Industry 4.0 Technologies – TechSaksham (Microsoft & SAP Initiative)

- XPro Program – AI and Machine Learning: Cancer Cell Prediction
  Issued by Employability.life in collaboration with Federation University Australia

7. ACHIEVEMENTS & CO-CURRICULAR ACTIVITIES

• Organizer – Typing Arena (ISTE)
Managed event scheduling, coordinated participants, and supervised evaluation during the technical competition.

• Co-Organizer – HackSprint 5.0
Assisted in organizing and coordinating a national-level hackathon conducted at PES College of Engineering.

• Volunteer – YRCW Blood Donation Camp
Contributed to organizing and managing activities during the campus blood donation initiative.

• Active Member – ISTE, YRCW, NSS
Participated in technical, social, and community service activities organized by student organizations.

• Runner-up – Minute to Win Competition (ISTE)

• Qualified – Internal Hackathon for Smart India Hackathon (SIH) 2025
Selected through the internal hackathon round by demonstrating innovative problem-solving and teamwork.

Adithya B K
